Interpretive MedManager reports

Having convenient access to interpretative reports that are concise and easy to understand is crucial to managing pain medication compliance. MedManager offers physicians clear interpretative results, normalized quantitative values on "positive" confirmations, and "consistent vs. inconsistent" interpretation based on the medications specified on the requisition.

Legacy Laboratory Services 1225 NE Second Avenue, Portland, OR 97232 (503) 413-1234 (877) 270-5566			
TOXICOLOGY

Collection Date	08/18/2010		
Collection Time	11:13:00		
		Reference	Units
U Specimen Validity Interp	Pass		
Drug Scn Creat	150.0	[20.0 – 400.0]	mg/dL
Drug Scn pH	5.70	[4.50 – 8.99]	pH
U Oxidants Drug Scn	Acceptable		
U Uric Acid Drug Scn	Normal		
U Specimen Validity Interp	See Below		
Prescribed Drugs			
Collection Date	08/18/2010		
Collection Time	11:13:00		
		Reference	Units
Alprazolam	Prescribed		
Hydrocodone	Prescribed		
Prescribed Drug Not Detected	Alprazolam		
PAIN MEDICATION COMPLIANCE PANEL – MedManager			
Collection Date	08/18/2010		
Collection Time	11:13:00		
		Reference	Units
ALCOHOL	negative		
AMPHETAMINES	negative		
BARBITURATES	negative		
BENZODIAZEPINES	negative		
BUPRENORPHINE	negative		
COCAINE METABOLITE	negative		
HEROIN METABOLITE	negative		
FENTANYL/METABOLITE	negative		
MARIJUANA METABOLITE	POSITIVE *		
THC-COOH Normalized	440		ng/mL
... Interp	INCONSISTENT *		
MDMA	negative		
METHADONE/METABOLITE	negative		
MEPERIDINE/METABOLITE	negative		
OXYCODONE	negative		
OPIATES	POSITIVE *		
Hydrocodone Normalized	1100		ng/mL
... Interp	CONSISTENT		
Hydromorphone Normalized	400		ng/mL
... Interp	CONSISTENT		
Hydromorphone Comment	Hydrocodone Metabolite		
PCP	negative		
PROPOXYPHENE / METABOLITE	negative		
TRAMADOL / METABOLITE	negative		

Designated section for prescribed drugs

Listing of the MedManager panel components

Clear identification of POSITIVE* and INCONSISTENT* results

Concise interpretations of positive drugs, including comment on drug metabolites
